To access@t-mobile.com, Sievert@t-mobile.com

Total network failure at 8440 S Las Vegas Blvd (89123). Both 5G Home Internet and mobile hotspot are pulling dial-up speeds (0.23 Mbps down / 0.21 Mbps up) at 1:50 AM.

This is a localized "zombie tower" / backhaul failure in Enterprise, South Vegas. I am a tech pro, homebound, and terminally ill—this service is a non-functional lifeline. Manual resets, Airplane mode, and "diagnostic links" only provide a 5-minute phantom fix before the sector crashes again. T-Mobile is ignoring a major hardware failure in the 89123 area. FIX THE PROVISIONING. #TDeath
#Enterprise #VegasOutage
