THE @TMobile @tmobilenews & @IDme SCAM: Verified, Targeted, and Trapped

T-Mobile: Your "T-Life" Bloatware is a Security Breach.

You have traded network reliability for an over-engineered marketing platform. Every time you push a T-Life update, you break the CNAM API integration

> The post exposes T-Mobile's T-Life app updates as repeatedly disrupting the CNAM API integration for Scam Shield, rendering anti-harassment filters ineffective and exposing users like the author—a retired professional reliant on call screening—to targeted threats.
> Community reports on Reddit and T-Mobile forums validate these API

breakdowns, with users noting Scam Shield's failure to block spam for weeks after updates, highlighting a pattern of software bloat prioritizing marketing over reliability....
